ASTRONOMY
AND
ASTRO-PHYSICS.

THE SIDEREAL MESSENGER
NAME OF THE FIRST TEN VOLUMES.

VOL. XII.

1893.

EDITORS:

W. W. PAYNE, GENERAL ASTRONOMY.

GEORGE E. HALE, ASTRO-PHYSICS.

ASSOCIATE EDITORS:

S. W. BURNHAM.
H. C. WILSON.
E. E. BARNARD.
JAMES E. KEELER.
HENRY CREW.
JOSEPH S. AMES.

NORTHFIELD, MINN.:
GOODSELL OBSERVATORY.
1893.

CONTENTS BY NUMBERS.

JANUARY.

General Astronomy: The problem of solar motion. Truman Henry Safford... 1
The Andromedes. J. Maclair Boraston... 3
The Star of Bethlehem. J. G. Porter... 6
Solar corona of April, 1893. (Plate II.) J. M. Schaeberle... 7
Proper motion and spectra of stars. W. H. S. Monck... 8
Two large telescopes. A. A. Common... 11
The Holmes' comet. (Plate I.) W. W. Payne... 17
Some recent markings on Jupiter. (Plate III.) Mary W. Whitney... 22
Probable origin of Holmes' Comet. Severinus J. Corrigan... 24
How the earth is measured. J. Howard Gore... 26
Physical appearance of Holmes' comet. H. C. Wilson... 31
Astro-Physics: Sun-spots and magnetic perturbations in 1892. A. Ricco... 33
An enormous prominence seen at Haynald Observatory, Oct. 3, 1892. (Plate IV.) J. Fenyi... 37
Solar observations third quarter of 1892. P. Tacchini... 39
The spectroscope of Allegheny Observatory. (Plates V, VI, VII.) J. E. Keeler... 40
Photographic spectrum of planetary nebulæ and of the new star (Plate VIII.) E. von Gothard... 51
Spectra of Holmes' and Brooks' comets (*f* and *d* 1892). W. W. Campbell 57
Distribution of stellar types in space. (Plates IX, X, XI, XII, XIII.) J. Maclair Boraston... 57
Astro-physical notes... 73-79
Current celestial phenomena... 79-90
News and notes... 90-95
Book and publisher's notices... 95-96

FEBRUARY.

General Astronomy: Predictions regarding the solar corona of the total eclipse of April 15-16, 1893. (Plate XIV.) Frank H. Bigelow... 97
Note on the probable origin of Holmes' comet. Severinus J. Corrigan... 99
Astronomy in 1893. W. W. Payne... 102
The star of Bethlehem. Lewis Swift... 105
The absorption of light in space. W. H. S. Monck... 107
Photographing minor planets. Dr. Max Wolf... 109
The double star Σ 2145. H. C. Wilson... 112
Work for large telescopes. E. C. Pickering... 114
The astro-photographic chart. Harold Jacoby... 117
The comets of 1892. H. C. Wilson... 121
Neglected field of fundamental astroromy. J. R. Eastman... 126
Astro-Physics: Gratings in theory and practice. Henry A. Rowland... 129
The Potsdam spectrograph. (Plate XV.) Edwin B. Frost... 150
Concave grating for the study of stellar spectra. Henry Crew... 156
The hydrogen line Hβ in the spectrum of Nova Aurigæ and in the spectrum of vacuum tubes. Victor Schumann... 159
The probability of chance co-incidence of solar and terrestrial phenomena. George E. Hale... 167
Stars having peculiar spectra. M. Fleming... 170
Astro-physical notes... 171-176
Current celestial phenomena... 177-186
News and notes... 186-191
Book and publisher's notices... 191-192

XUM

MARCH.

General Astronomy: Holmes' comet. Photographed by E. E. Barnard. Frontispiece, (Plate XVI).
The planet Jupiter and its satellites. William H. Pickering 193
Swift's comet (*a* 1892). A. E. Douglas 202
Observations of the parallax of O. Arg. 14320. F. P. Leavenworth 206
The balance roof for telescope buildings. A. E. Douglas 207
Some effects of a collision between two astcroids. Severinus J. Corrigan. 207
A simple method of reducing time observations made with the transit instrument. Charles B. Hill 212
Astro-Physics: The work of Kayser and Runge on the spectra of the elements. Joseph Sweetman Ames 226
On the refraction of rays of great wave-length in rock salt, sylvite and fluorite. (Plates XVII and XVIII.) H. Rubens and Benjamin W. Snow 231
The spectroheliograph. George E. Hale 241
Researches on the Spectrum of β Lyræ. A. Belopolsky 258
Photography of the corona without an eclipse. George E. Hale 260
Distribution in latitude of solar phenomena observed during the third quarter of 1892. P. Tacchini 262
Solar statistics in 1892. R. Wolf 263
Solar electro-magnetic Induction. M. A. Veeder 264
Eclipse photography. A. Taylor 267
Astro-physical notes 270–273
Current celestial phenomena 274–280
News and notes 280–287
Book and publisher's notices 287–288

APRIL.

General Astronomy: Holmes' comet. Drawings by W. F. Denning, England. (Plate XIX.)
Evolution of the double star systems. (Plates XX and XXI.) T. J. J. See 289
Relations between the mean motions of Jupiter, Saturn and certain minor planets. Daniel Kirkwood 302
Some effects of a collision between two asteroids. (Illustrated.) S. J. Corrigan 304
Dimensions of small planets. D. P. Todd 313
Neglected field of fundamental astronomy. J. R. Eastman 315
Possibilities of the telescope. Alvan G. Clark 319
Astro-Physics: A new table of standard wave-lengths. H. A. Rowland 321
Note on the spectrum of sulphur. B. Hasselberg 347
Note on the spectrum of Nova Aurigæ, William Huggins 349
Visual observations of the spectrum of β Lyræ. (Plate XXII.) James. E. Keeler 350
Astro-physical notes 362–366
Current celestial phenomena 367–375
News and notes 376–383
Publisher's notices 384

MAY.

General Astronomy: The Leonids, or meteors of Nov. 13. (Illustrated) Daniel Kirkwood 385
Jupiter's satellites. (Illustrated.) William H. Pickering 390
The period of Σ 1785. (Illustrated.) S. W. Burnham 397
The balance roof for telescope buildings. (Plates XXIII and XXIV.) Charles A. Post 400
Orbit of the binary star β 416. S. Glasenapp 402
The period of 20 Persei (β 524). (Illustrated.) S. W. Burnham 404
On the formation of rings as a process of disintegration. Dr. M. Wilhelm Meyer 407
The evolution of double stars. C. H. Darwin 413
Astro-Physics: Recent observations of Nova Aurigæ. W. W. Campbell 417

XUM

On the Origin of sunspots. Egon von Oppolzer..... 419
Solar phenomena in the fourth quarter of 1892. P. Tacchini..... 425
On the dispersion of air. C. Runge..... 426
On the variable star Algol. William Ferrel..... 429
Note on the spectra of the flames of some metallic compounds. G. D. Liveing and J. Dewar..... 434
On a certain asymmetry in Professor Rowland's concave gratings. (Illustrated.) J. R. Rydberg..... 439
The magnetic storm and auroras of Jan. 7 to 10, 1886. M. A. Veeder..... 449
Spectroscopic notes from the Kenwood Observatory. (Plate XXV.) George E. Hale..... 450
A method of determining the index of refraction and the disperson of air. B. Hasselberg..... 455
Astro-physical notes..... 461
Current celestial phenomena..... 465
News and notes..... 470–479
Publisher's notices..... 480

JUNE.

General Astronomy: Jupiter's outer satellites. (Plate XXVI.) Frontispiece.
The rotation of Jupiter's outer satellites. William H. Pickering..... 481
The orbit of 9 Argus (β 101). (Plate XXVII.) S. W. Burnham..... 494
Orbit of a new rapid binary star 20 Persei = β 524. (Plate XXVII a.) S. Glasenapp..... 499
New variable star in Aries. S. Glasenapp..... 503
Experiments in electric lighting. H. A. Howe..... 505
The orbit of ζ Sagittarii. (Plate XXVIII.) T. J. J. See..... 510
A new apparatus for measuring photographic plates..... 512
Astro-physics: Spectra and motions of stars. W. H. S. Monck..... 513
The distribution of the stars. Miss A. M. Clerke..... 515
The temporary star in Auriga. A. L. Cortie..... 521
The solar chromosphere in 1891 and 1892. Walter Sidgreaves..... 539
The spectroscope of the Royal Observatory of Edinburgh. L. Becker..... 542
On the geometrical construction of the oxygen lines, Great A, Great B and a, of the solar spectrum. George Higgs..... 547
Spectrum of γ Argus. W. W. Campbell..... 555
Comparison of the international metre with the wave-length of the light of cadmium. Albert A. Michelson..... 556
Astro-physical notes..... 560–564
Current celestial phenomena..... 564–570
News and notes..... 570–575
Publisher's notices..... 576

AUGUST.

General Astronomy: Frontispiece. (Plate XXIX.) Comet *b* 1893.
Probable advantages in astronomical photography of short focus lenses. Rev. George M. Searle..... 577
On a graphical method of deriving the apparent orbit of a double star from the elements. (Plate XXX.) T. J. J. See..... 581
Orbit of 70 Ophiuchi. (Plate XXXI.) S. W. Burnham..... 585
The orbit of OΣ 285. (Plate XXXII.) S. W. Burnham..... 586
The motion of 6 Eridani. (Plate XXXIII.) S. W. Burnham..... 587
A micrometer for measuring plates of the astro-photographic chart. W. H. M. Christie..... 588
Rev. Charles Pritchard, D. D., F. R. S..... 592
The development of solar system. Daniel Kirkwood..... 594
Astronomy in Russia. S. W. Burnham..... 595
Comet *b* 1893. W. W. Payne..... 596
The zodiacal light..... 599
Systematic study of auroræ. W. W. Payne..... 602
Longitude operations at Greenwich and photographic work..... 607
Astro-Physics: Bright bands of the spectrum of Nova Aurigæ. William Huggins and Mrs. Huggins..... 609

XUM

The Tulse Hill spectroscope. (Plate XXXIV.) William Huggins..... 615
Photographic observations of the planets. Edwin B. Frost..... 619
On certain technical matters relating to stellar photography. Max Wolf. 622
Some recent attempts to photograph the faculæ and prominences. J. Evershed, Jr..... 628
On the Sun's rotation as determined from the positions of the faculæ. A. Belopolsky..... 632
On the determination of the Sun's rotation from the positions of the faculæ. Dr. Wilsing..... 635
On the rotation of the Sun as measured by the position of faculæ. A. Belopolsky..... 637
Astro-physical notes.....640–654
Current celestial phenomena.....654–663
News and notes.....663–670
Book notices.....670–671
Publisher's notices..... 672

OCTOBER.

General Astronomy: The Yerkes telescope. Frontispiece. (Plate XXXV)
Great telescopes of the future. Alvan G. Clark..... 673
The orbit of 37 Pegasi. (Plate XXXVI.) S. W. Burnham..... 678
The double star, 95 Ceti (A. C. 2). S. W. Burnham..... 681
A field for woman's work in astronomy. Mrs. M. Fleming..... 683
ω Centauri. Solon I. Bailey..... 689
Polar inversion of the planets and satellites. (Illustrated.) Willlam H. Pickering..... 692
On the form of the corona April 16, 1893. J. M. Schaeberle..... 693
Construction of large refracting telescopes. W. R. Warner..... 695
Latitude and longitude of the new naval observatory. J. R. Eastman.... 699
Orbit of the double star $O\Sigma$ 224. (Illustrated). S. Glasenapp..... 702
Astro-Physics: The two magnetic fields surrounding the sun. (Plate XXXVIII.) Frank H. Bigelow..... 706
The constitution of the stars. Edward C. Pickering..... 718
The nature of Nova Aurigæ's spectrum. W. W. Campbell..... 722
Preliminary note on the corona of April 16, 1893. (Plate XXXIX.) J. M. Schaeberle..... 730
Wave-lengths of the two brightest lines in the spectrum of the nebulæ James E. Keeler..... 733
Contributions on the subject of solar physics. E. R. von Oppolzer..... 763
Astro-physical notes.....743-752
Current celestial phenomena.....752–760
News and notes.....760–767
Book notices..... 767
Publisher's notices..... 768

NOVEMBER.

General Astronomy: On the general refraction at Madison, Wis. George C. Comstock..... 769
Photographic observation of minor planets. Max Wolf..... 779
The bureau of measurements of the Paris observatory. (Plate XL.) Dorothea Klumpke..... 783
Meteoric astronomy, Daniel Kirkwood..... 789
The orbit of β 416. (Plate XLI.) S. W. Burhnam..... 792
The orbits of comet 1889 V. (Illustrated.) H. C. Wilson..... 793
The Jupiter family of comets. (Illustrated.) W. W. Payne..... 800
Astro-Physics: On the spectra of the elements. H. Kayser and C. Runge..... 802
Electro-magnetic theory of the sun's corona. Hermann Ebert..... 804
Stars having peculiar spectra. M. Fleming..... 810
The spectra and proper motions of stars. W. H. S. Monck..... 811
Application of Doeppler's principle to the motion of binary stars as a means of improving stellar parallaxes and orbits, and as a means of testing the universality of the law of gravitation. T. J. J. See..... 812
On the absolute scale of intensity for the lines of the solar spectrum and for quantitative analysis. (Illustrated.) L. E. Jewell..... 815

XUM

Heliographic longitudes referred to the solar magnetic meridian. (Illustrated.) Frank H. Bigelow 821
Physical constitution of the sun. Walter Sidgreaves 826
On the theory of stellar scintillation. Lord Rayleigh 834
Astro physical notes 845
Current celestial phenomena 849
News and notes 855
Book notices 862
Publisher's notices 864

DECEMBER.

General Astronomy: On a practical method of determining double star orbits by a graphical process, and on the elements Ω and λ. (Illustrated.) T. J. J. See 865
The system of ζ Cancri. S. W. Burnham 872
A new discussion of Peter's series of observations treated by Professor Chandler. F. Folie, Director of Belguim Observatory 874
On a new pendulum escapement. (Illustrated.) Mr. Leman 882
The so-called law of Bode as applied by Challis to satellites 895
Astro-Physics: On the new star in Auriga. H. C. Vogel 896
Hydrogen of the envelope of the star DM + 30° 3639. W. W. Campbell. 913
Theory of the Sun. A. Brester, Jz 914
The Theory of Stellar Scintillation. Lord Rayleigh 921
Astro-physical Notes 924
Current celestial phenomena 924–938
News and notes 938–941
Book notice 941
Publisher's notices 942
General Index for Vol. XII 943
Index by months, table of illustrations, and title page.

ILLUSTRATIONS.

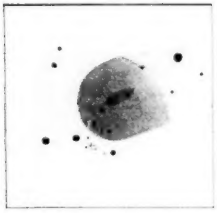
Sketches of Holmes' comet by H. C. Wilson at Gooodsell Observatory, Plate I, frontispiece No. 111.
Theoretical sketch of the solar corona of April 16, 1893, by J. M. Schaeberle, Plate II, following 8
Sketches of Jupiter made at Vassar College Observatory, Plate III, following 22
Position of Sunspots for some strong magnetic perturbations in 1892 36
Prominence observed at the Haynald Observatory, Oct. 3, 1892, Plate IV, following 38
The Allegheny Observatory spectroscope arrangement with grating for visual observations, Plate V, following 40
The Allegheny Observatory spectroscope arrangement with single prism for visual observations, Plate VI, preceding 41
The Allegheny Observatory spectroscope with trains of prisms for photographing stellar spectra, Plate VII, following 48
Studies on photographic spectrum, Plate VIII, following 52
Draper Catalogue 1890, curves of distribution for observed brightness, Plates IX to XII, following 64
Distribution of the stellar types in space, Plate XIII, preceding 65
Paths of Saturn and Uranus 80
Predicted solar corona of the total eclipse of April 15-16, 1893, Plate XIV, frontispiece No. 112
Motion of double star Σ 2145 113
Orbits of Holmes' and Biela's comets and some of the minor planets 124
The Potsdam spectrograph 151
The Potsdam spectrograph Plate XV, following 152
Holmes' comet, Nov. 8, 1892, by E. E. Barnard, Lick Observatory, Plate XVI, frontispiece, No. 113
Chart showing the velocity of luminous masses, from the head in the tail of Swift's comet 204
Chart showing the position angle of the streamers from the head of Swift's comet 205
Refraction of rays in rock-salt and sylvite, Plate XVII, following 240
Refraction of rays in rock-salt, sylvite and fluorite, Plate XVIII, preceding 241
Holmes' comet by W. F. Denning, Plate XIX, frontispiece No. 114
Evolution of double star systems, Figs. *a* and *b* 293, 294
Evolution of double star systems, Plate XX preceding 297
Evolution of double star systems, M. Poincairé's Apioid 300
Evolution of double systems, Plate XXI, following 300
Effects of collision between two asteroids, Fig. 1 305
Effects of collision between two asteroids, Figs. 2 and 3 311
The D_3 line in the spectrum of β Lyræ, Plate XXII, following 352
Apparatus for observing solar corona without eclipse, Fig. 1 363
Apparatus for observing solar corona without eclipse, Fig. 2 364
Chart of solar eclipse April 15-16, 1893, Fig. 1 374
Chart of solar eclipse, April 15-16, 1893, Fig. 2, following 374
Chart of solar eclipse, April 15-16, 1893, Fig. 3 375
Orbit of the November meteors 387
Direct and retrograde motion of Jupiter's satellites 393
Flattening of the disc of Jupiter's satellites near the limb of the planet 396
Orbit of Σ 1785 399
The balance roof for telescope buildings, No. 1 and 2, Plate XXIII, following 400
The balance roof for telescope buildings, Nos. 3 and 4, Plate XXIV, preceding 401
The orbit of 20 Persei (β 524) 405

XUM

Asymmetry in Professor Rowland's concave grating, Fig. 1..... 442
Asymmetry in Professor Rowland's concave grating, Fig. 2..... 448
The solar prominences and faculæ of April 16, 1893, Plate XXV, following.. 450
Jupiter's outer satellites, Plate XXVI, frontispiece No. 116.
Orbit of 9 Argus (β 101), Plate XXVII, following..... 496
Orbit of 20 Persei (β 524), Plate XXVIIa preceding..... 501
Variation in brightness of U Arietis..... 503
Experiments in electric lighting, Fig. 1 and 2.....508-509
Orbit of ζ Sagittarii, Plate XXVIII, following..... 510
Paris Observatory, new apparatus for measuring photographic plates..... 512
Profile-areas of sun-spots and prominences..... 540
Geometrical construction of absorption lines, Figs. 1 and 2.....550, 551
Comet *b* 1893, photographed by Dr. H. C. Wilson July 11, 1893, frontispiece No. 117.
Method of deriving the apparent orbit of a double star, Plate XXX, preceding 583
Orbit of 70 Ophiuchi, Plate XXXI, preceding..... 585
Orbit of OΣ 285, Plate XXXII, following..... 586
Orbit of 6 Eridani, Plate XXXIII, preceding..... 587
Micrometer for measuring the plates of the astro-photographic chart, Figs. 1 and 2.....589, 590
Bright bands in the spectrum of Nova Aurigæ..... 610
The Tulse Hill spectroscope, Plate XXXIV, preceding..... 615
Relative positions of Comet *b* 1893 and the Earth..... 659
The Yerkes telescope, Plate XXXV, frontispiece, No. 118.
Orbit of 37 Pegasi, Plate XXXVI, following..... 680
Polar inversion of the planets and satellites..... 693
Orbit of double star OΣ 224..... 703
Variation of the intensity of the coronal field, Plate XXXVIII, following... 714
The corona of April 16, 1893, plate XXXIX, following 732
Paris Observatory, new apparatus for measuring photographic plates, Plate XL, preceding..... 785
Orbit of Beta 416, plate XLI, following..... 792
The orbit of Comet 1889 V. before and after its approach to Jupiter in 1886, 797
The path of Comet 1889 V through Jupiter's satellite system, July 18-21, 1886, 798
Jupiter's family of comets, following 800
Scale of intensity for lines of the solar spectrum 820
Heliographic longitude referred to the solar magnetic prime meridian 822
γ Virginis = Σ 1670..... 871
Mercurial compensation—pendulum of Riefler..... 888
Hydrogen envelope of the star DM + 30°.3639..... 914
Stellar Scintillation..... 922

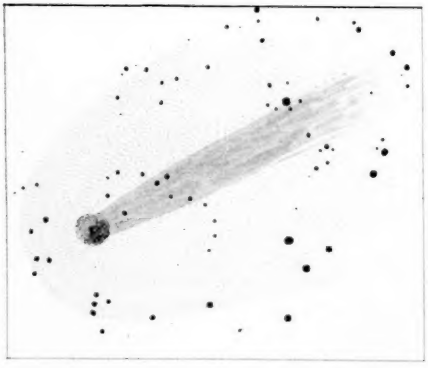
PLATE I

Fig. 1.



Nov. 11, 1892, $10^h\ 30^m$

Fig. 2.



Dec. 10, 1892, 8^h

Sketches of Holmes' Comet by H. C. Wilson at Goodsell Observatory.
